

CASH DEPOSIT MACHINE

CASH DEPOSIT MACHINE (CDM) TO
OPTIMIZE CASH HANDLING PROCESS

FUNCTIONALITY:

The Cash deposit machine is safe designed for indoor installation with the purpose of optimizing the personnel work with cash, reducing the risks of cash storage and creating new competitive advantages for the banking institution in the service segment of small and medium businesses.

CDM is the reliable first class certified safe that allows you to use it also for the night storage of cash without needing to collect cash every day. The compact size of CDM provides convenient use even in the limited space of bank micro-branches, customer service points, etc.

POPULAR USE CASES:

Possible variants of use and potential users of the automated safes:

- 01 CIT companies
- 02 Bank branches
- 03 Shopping / Business center
- 04 Large retail networks for automated cash collection
