

SP-24 SMART PRINTER FOR BANDING PROCESSES

FUNCTIONALITY:

SP-24 is a smart printer designed for printing data on banding tapes. With a dedicated internal program, users can easily change or add print data. The system is easy to integrate into buckling type packaging machines, making it ideal for use in high cash flow industries. SP-24 is designed and manufactured to work in restricted areas due to its small structure.

ADVANTAGES:

Thanks to its small dimensions (11cm x 15.5cm x 15cm) and weight of only 2.7kg, any desired loop can be positioned on the banding device and workplace can easily change.

The machine works with 12V low voltage; 12V adapter to feed the machine is delivered with it.

There is no electrical or electronic connection with the banding machine on which it is positioned. The printer unit is powered by its own external adapter. It is completely independent.

The real time chip inside the printer helps to identify the actual date and time information during the banding on the 4th line to be printed on the tape. Each of the 4 lines written on the tape is 24 digits and can include bank's name, date and time, denomination, operator's ID, etc.

The first 3 lines can be changed and selected, as well as the date and time information can be loaded and changed on the machine or with the Data Transfer Program. The information to be written on the other 3 lines has already been uploaded to the machine by the user and 8 options can be selected for the first 2 lines and 30 options for the 3rd line.

TECHICAL SPECIFICATIONS:

BAND PAPER - PE	COATED PAPER - WIDTH 40 MM
	ROLL INNER DIAMETER - DEPENDS ON MACHINE USAGE
	ROLL OUTER DIAMETER - DEPENDS ON MACHINE USAGE
TAPE TYPE	COMPATIBLE WITH ANY LOOP BANDING PRINTER
POWER ADAPTER	DC 12V – MAX 40W
	INACTIVE - 3W
	12V ADAPTER INCLUDED IN DELIVERY
PRINT CARTRIDGE	HP 51645 A (42 ML) OR EQUIVALENT CARTRIDGE
NOISE LEVEL	30 DB LESS THAN (A)
WEIGHT	2,7 KG (INCLUDING CARTRIDGE)
DIMENSIONS	WXLXH : 11 X 15,5 X 15 SM
